When it's re-enforced at home & at school we are building our children up to become amazing young people :-)

Did You Know: Positive early language and literacy development can give children a window to the world! Helping to ensure that each child can seize his or her potential for future success. During the first 3 years of life, the brain undergoes its most dramatic development and children acquire the ability to think, speak, learn, and reason. When this early development is not nurtured, the brain's architecture is affected and young children begin to fall behind.
